

## **9. Ministry of Environment, Forest and Climate Change**

### ***Agenda – Discussing the Future of Clean Energy in India***

A transition to clean energy is about making an investment in our future. This maxim has been proven true and as a result, the world has started realizing the importance of switching to renewable energy. However, two big barriers still stand in the way of being environment friendly, Automobile and Power Industries. About 80% of the world's power comes from Non-renewable sources. This issue is even more prevalent in automobiles as less than 1% of all vehicles do not use fossil fuels.

This committee will mainly focus on how the government can make fuel production more environment friendly and how it can persuade more people to switch to electric vehicles.

#### **MINISTRY- MATRIX**

<b>VIPIN SODHI – TAMIL NADU</b>	<b>BALBIR SINGH SEECHAWAL – PUNJAB</b>
<b>JADAV PAYENG - ASSAM</b>	<b>BHAVISH AGRAWAL - KARNATAKA</b>
<b>GURDEEP SINGH - NEW DELHI</b>	<b>SAURABH AGRAWAL – WEST BENGAL</b>
