

## **2. Ministry of Information and Broadcasting**

### ***Agenda – Suggesting Measures to Reform Indian Media in the Light of Recent Developments***

The media is one of the most important pillars of our nation. In recent years, there has been a downfall in the quality and the ways of reporting news. Increased competition between various channels has consumed sympathy and moral etiquettes while reporting sensitive news. Moreover, the news channels sometimes act as judge themselves and pass judgements too early which harms the victim's reputation. Furthermore, the bias towards some political party or figure is also quite evident.

These are some of the problems which can be addressed by the delegates as they put forward the condition of their respective states. The resolution shall reflect good points on improving the worth, as well as the working style of the media.
